RE: Crown Point Avenue Improvement Project

Dear Neighbor,

The City of Omaha has contracted with Olsson Associates on the Crown Point Avenue Improvement Project, which spans 72nd Street to Blair High Road. The purpose of the project is to replace pavement that is in poor condition and repurpose the existing width of the street to safely accommodate multiple modes of transportation. During the next year, there will be several opportunities for public input on this project. Our project team will work closely with area businesses, residents and Northwest High School to communicate project plans and gather feedback.

In the coming weeks, field staff will be in the area and will need to access properties to obtain survey data along the project corridor. This will potentially require our survey crew to enter your property adjacent to the street and collect survey data up to 50 feet beyond your property line. Please let us know if special arrangements need to be made before we enter your property.

For additional information, please refer to the Keep Omaha Moving website where there is a project page dedicated to the Crown Point Avenue Improvement Project. Information will be updated regularly and will be an ongoing source of information for project. The Keep Omaha Moving website address is www.keepomahamoving.com

If you have any other questions, please contact one of the project managers below. We look forward to working with you!

Sincerely,

Jon Meyer, PE
Project Manager
