

72nd Street Construction New Detour in January

Delays Expected

The City of Omaha thanks residents, businesses, and drivers for their patience during the construction of this project!

The City of Omaha's 72nd Street project between F Street and just south of I-80 will continue in 2025. The improvements, once completed, will increase capacity and safety while decreasing congestion.

Beginning in mid-January 2025, southbound 72nd Street will be closed at I-80, creating a full closure of 72nd Street from I-80 to F Street. Northbound 72nd Street will also remain closed for approximately six months. The detour for this closure is pictured on the reverse side of this card.

When the northbound bridge is complete in mid-2025, 72nd Street will have one lane open northbound and two lanes open southbound to traffic through the construction zone. Construction of the new southbound bridge is anticipated to last through the fall of 2025.

Construction schedules and operations are subject to change based on weather conditions. The project team will update stakeholders as the project progresses.

For immediate questions during construction, please call the project hotline at 402.444.5220. For more information and status updates regarding this project, please visit www.keepomahamoving.com/projects.
