78th Street Improvements - Mercy to Pacific

About the Project

Reconstruction of 78th Street, from Mercy to Pacific, includes sidewalk, storm sewer, driveway, roadway pavement, and retaining walls. The project will include a traffic study and public involvement to determine the concept for the corridor as well as keeping the community informed of the progress through to final design and construction. Roadway improvements on Poppleton Avenue from 78th Avenue to 78th Street are also included in this project.
