

78th Street Improvements Mercy Road to Pacific Street

July 24, 2018

City of Omaha Project OPW 52281

ABOUT THE PROJECT

The project will include the reconstruction of 78th Street, from Mercy Road to Pacific Street. Improvements will include street pavement, sidewalks, storm sewers, driveways, and retaining walls. Street improvements on Poppleton Avenue from 78th Avenue to 78th Street will be constructed in conjunction with this project.

PURPOSE AND NEED

This project provides the opportunity to address safety issues along the project corridor that result from inadequate sight distance, the lack of sidewalks, and the lack of storm sewers, in addition to the necessary replacement of the aging street pavement.

Information Meeting

The City of Omaha is holding an open house to present information and gain stakeholder input for a street improvement project along 78th Street from Mercy Road to Pacific Street. An update on adjacent projects will also be presented.

Thank you for joining us tonight. A brief presentation will begin at 6:15 p.m. Team members from the City of Omaha and their consultant Lamp Rynearson will be available at stations to discuss the project. Thank you in advance for your input.
